

# WASHLET™

The ultimate solution  
for quality and hygiene

hygiene  
mygiene

**TOTO**

# Cleanliness and comfort TOTO makes the difference.

Gentle warm water cleansing, odour extraction and a heated seat enhance the well-being of everyone who uses WASHLET™. Comfort is a top priority for all TOTO products – it's how we turn daily habits into enriching experiences.

Since the product launched in 1980, TOTO has continuously developed WASHLET™ technologies to achieve even greater cleanliness and hygiene. Many of these sophisticated technologies are truly unique and only available from TOTO.

# Above the rim wand jet placement – for maximum hygiene

Every WASHLET™ features proven TOTO clean technologies. Importantly placing the **wand jet above the toilet bowl** thus avoiding contamination. This keeps the WASHLET™ incredibly clean – like the very first time it was used. WASHLET™ is a shower toilet from TOTO with the highest hygiene standards.

## WASHLET™

TOTO always positions the wand jet above the ceramic bowl

### Hygienic wand jet

- Positioned above the ceramic bowl – away from the “action”
- Cannot come into contact with urine or faeces after use
- Cannot come into contact with flushing water
- A higher position protects the wand jet and components from being affected by rising water due to a clogged toilet

## Conventional shower toilet

Wand jet placed within the toilet bowl

### Great potential for contamination

- Positioned in the middle of the “action”
- Tip of the wand jet can come into contact with urine and faeces
- Wand jet can come into contact with flush water
- Wand jet and technology are placed within the toilet bowl, and can be contaminated if the toilet is clogged

# WASHLET™

As clean as brand new –  
with every use

## PREMIST

Automatically sprays a fine mist of water on the toilet bowl before each use, forming a film of water that makes it more difficult for waste and dirt to accumulate.

## Rimless design

The rimless toilet bowl is standard on all TOTO toilets. There are no difficult to reach places for dirt and waste to accumulate.

## DRYER \*

Warm air drying reduces toilet paper use.

## CEFIONTECT glaze

Ultra-smooth ceramic leaves nowhere for waste to cling.

## TORNADO FLUSH

Each toilet features the highly effective TORNADO FLUSH.

\* Only selected WASHLET™ models offer this feature.

## Hidden jet above the rim

The fully covered chamber protects the wand jet and dryer from dirt and contamination.

## EWATER+ \*

Depending on the model, the toilet bowl and/or WASHLET™ wand jet are cleaned with electrolysed water after use.

## Self-cleaning wand jet

The wand jet automatically cleans itself inside and out before and after each use.

## Decalcifying function \*

Depending on the model, WASHLET™ is easy to decalcify.

## Wand jet position

The wand jet extends at a 43° angle during cleansing. This careful positioning means faeces cannot come into contact with the wand jet during cleansing.

## Wand jet material

The wand jet is made of a silicone-based material, which makes it difficult for dirt or waste to stick.

# WASHLET™

## For every taste and price class

Millions of customers around the world rely on their TOTO WASHLET™. TOTO's over 40 years of experience guarantee the best hygiene and most sophisticated technologies.
