

Toilets

Setting new standards in hygiene.

CLEANLINESS

TORNADO FLUSH

Highly effective two- or three-jet flush

RIMLESS DESIGN

Ceramic toilet bowl without hard-to-reach areas along the top edge

CEFIONTECT

Smooth glaze for a special hygienic ceramic surface

SUSTAINABILITY

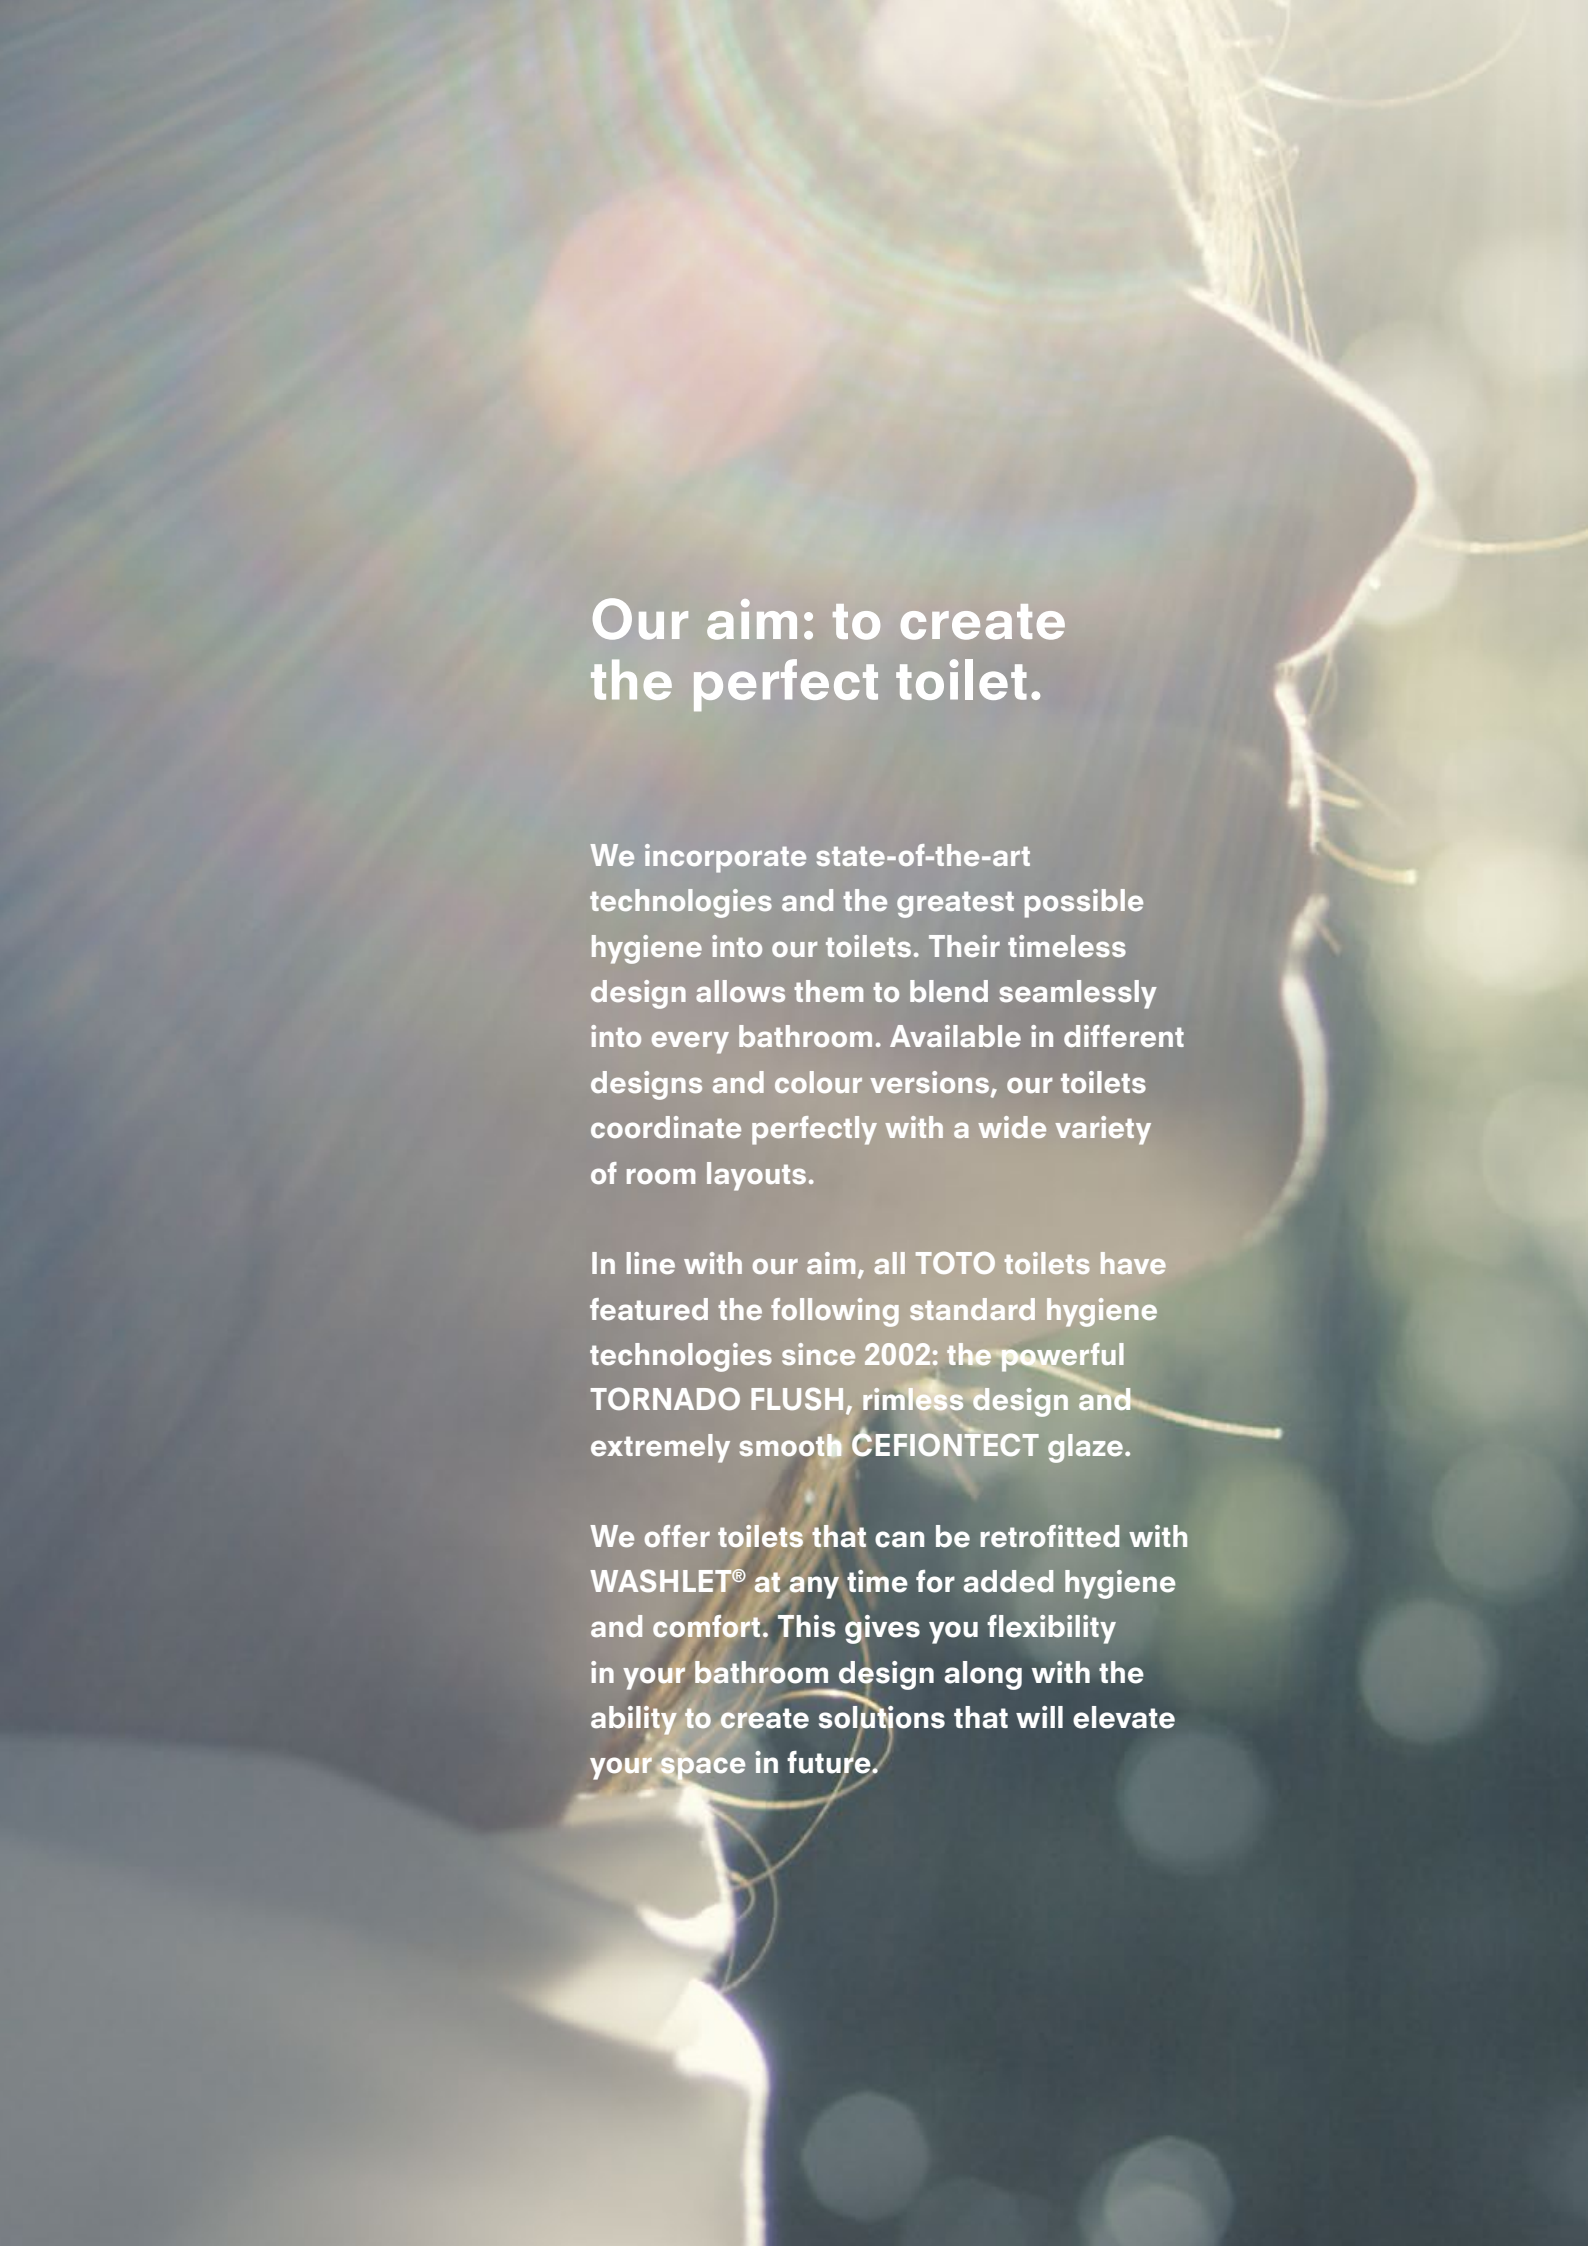

WATER-SAVING

Technologies that save water

4.5L FLUSH

Water-saving full flush uses just 4.5 l

Our aim: to create the perfect toilet.

We incorporate state-of-the-art technologies and the greatest possible hygiene into our toilets. Their timeless design allows them to blend seamlessly into every bathroom. Available in different designs and colour versions, our toilets coordinate perfectly with a wide variety of room layouts.

In line with our aim, all TOTO toilets have featured the following standard hygiene technologies since 2002: the powerful TORNADO FLUSH, rimless design and extremely smooth CEFIONTECT glaze.

We offer toilets that can be retrofitted with WASHLET® at any time for added hygiene and comfort. This gives you flexibility in your bathroom design along with the ability to create solutions that will elevate your space in future.

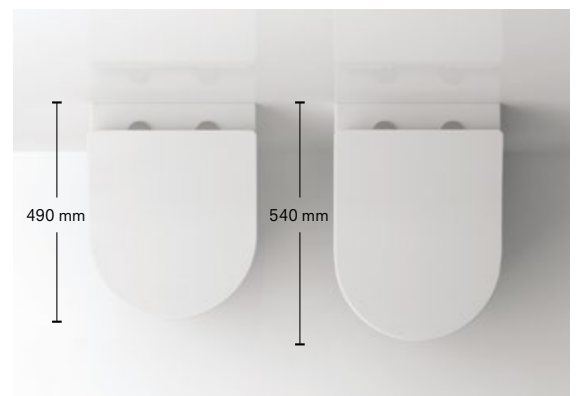

WC RP, wall-hung (CW552RY) with RP toilet seat (TC513Q); also available as a toilet with optional WASHLET® (see page 17)

Toilet RP and RP Compact

The name says it all: RP stands for “Round Perfection”. With its harmonious round shape, concealed mounting screws and matching flat toilet seat, it captivates with its timeless elegance.

The shortened version, the RP Compact with a depth of 490 mm is the perfect addition for small bathrooms and guest WCs.

A direct comparison of RP and RP Compact toilet

Toilet RP Compact, wall-hung (CW554Y) with RP Compact toilet seat (TC613G)

Floor-standing RP toilets

The RP toilet is also available as a floorstanding "back-to-wall" model and a close coupled version with a ceramic cistern.

Both floorstanding RP toilets already have openings for water and power, making it possible to upgrade to WASHLET® anytime. FlexCovers are placed on these openings while RP is used with its regular toilet seat.

WC RP, back-to-wall, floor-standing (CW563Y#XW) with WC seat RP (TC513Q)

WC RP, close coupled (CW561Y#XW) with ceramic cistern RP (SW561DY#W) and WC seat RP (TC513GQ)

WC RP matt White, wall-hung (CW552RY#MW) with WC seat RP matt White (TC518EU#MW)

TOTO toilets with matte ceramic surfaces

Expanding our colour palette to include matte white and matte black gives you the chance to incorporate new design accents into the bathroom. TOTO also offers coordinating washbasins and WASHLET® models in both colour versions to match the matte-finish toilets.

RP toilet matte white

A focus on the essentials: TOTO is creating new accents for modern bathrooms with the wall-hung RP toilet in matte white. The reimagined RP toilet exudes pure, minimalist elegance with a new tactile experience, radiating a sense of quiet luxury.

WC RP matt Black, wall-hung (CW552RY#MBL) with WC seat RP matt Black (TC518EU#MBL)

RP Toilet matte black

The embodiment of extravagance: The new black matte version of the wall-hung RP Toilet reflects design excellence, luxury and elegance unlike any other ceramic colour. The dark finish makes a strong impact. The matte black surface is unexpected, adding a strong accent to the bathrooms of tomorrow. Black provides the perfect backdrop for design, lending depth to each room.

SP toilet

The toilet SP is the angular counterpart of the RP. The SP stands out due to its straightforward, linear and angular design. Find these characteristics also reflected in the product name: SP means "Square Perfection".

SP toilet, wall-hung (CW532RY) with SP toilet seat (TC512G); also available as a toilet with optional WASHLET® (see page 17)

Toilet GP, wall-hung (CW553Y) with GP toilet seat (TC524EU)); also available as a toilet with optional WASHLET® (see page 17)

GP toilet

The GP toilet convinces with its graceful design style. Its timeless design allows the toilet to be perfectly integrated into a diverse range of interior designs.

NC toilets

The wall-mounted NC toilet was one of the first rimless toilets on the European market. The name of the toilet is programme: NC means "natural curves" and thus this toilet captivates by its timeless, natural

round shape. All versions can be combined with a slim toilet seat in addition to the regular NC toilet seat.

NC toilet, wall-hung (CW762Y) with slim toilet seat (TC514G)

WC NC, close coupled (CW761Y) with ceramic cistern NC (SW760DY) and NC toilet seat (VC100N)

NC toilet back-to-wall, floor-standing (CW763Y) with NC toilet seat (VC100N)

Floorstanding NC toilets

A floorstanding “back-to-wall” model and a close-coupled version with a ceramic cistern are available in addition to the wall-hung NC toilet.

MH toilet, wall-hung (CW162Y) with slim toilet seat (TC514G)

MH toilets

The toilets of the MH series appeal with their flowing, simple form.

In addition to the wall-hung toilet, there is also a floor-standing back-to-wall version and a close coupled version, which is particularly suitable for renovation projects e.g. in old buildings.

For a particularly elegant look, all toilet models of the MH series can be combined not only with the MH toilet seat but also with a slim toilet seat.

MH toilet back-to-wall, floor-standing (CW163Y) with MH toilet seat (VC10047NN)

MH toilet, close coupled (CW161Y) with ceramic cover MH with cistern (SW10044G1) and MH toilet seat (VC10047NN)

ES toilet, wall-hung (CW797) with ES toilet seat (VC110N)

ES toilet

The wall-hung ES toilet has a straight-line design with easily accessible mounting screws on the sides, which allow a particularly quick installation.

This toilet can also be combined with a slim toilet seat in addition to the usual toilet seat.

Coordinating push plates

It's possible to order push plates in silver, matte white and matte black to coordinate with our toilets. The TOTO frame system is required for installation.

Push plate Silver (MB175M#SS)

Push plate matt Black (MB175M#B)

Push plate matt White (MB175M#W)

CEFIONTECT

**Forces waste
to slide down**

Ultra-smooth ceramic
leaves nowhere
for waste to cling.

CEFIONTECT is an ultra-smooth ceramic glaze that coats the toilet bowl. Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

Extremely smooth glaze

No CEFIONTECT

CEFIONTECT

Conventional ceramic may mould perfectly smooth to the eyes, but has gaps where waste, mold and bacteria hide. At just one millionth of a millimetre, CEFIONTECT's surface ridges are much tinier than waste particles.

CEFIONTECT is hydrophilic

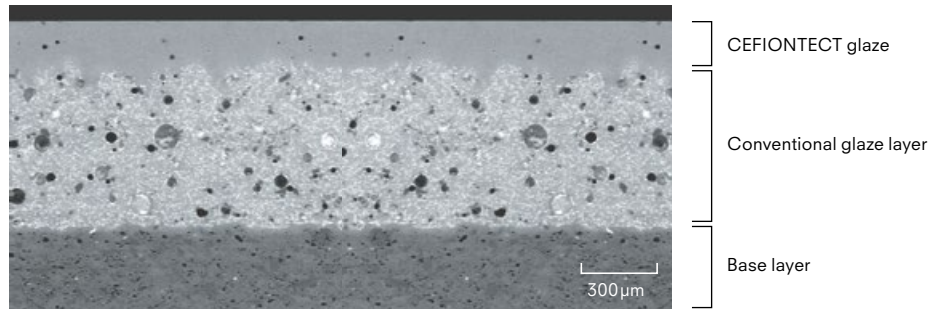

Water hydrophobic

Water hydrophilic

Hydrophilic describes organisms and materials that attract water. CEFIONTECT is hydrophilic. Water spreads easily over the toilet bowl, so waste particles easily wash away.

What makes CEFIONTECT so durable?

Layers of glass are fired onto the conventional glaze, making CEFIONTECT extremely durable. Unlike conventional ceramics, it's possible to clean TOTO ceramics with microfibre cloths without any damage.

TORNADO FLUSH

**Swirls and ejects
waste entirely**

360° cleaning power
reaches every spot
using less water.

TORNADO FLUSH cleans more effectively – but is also quieter, and uses less water than conventional toilets. The powerful flush creates a whirlpool that cleans every inch of the toilet bowl without missing a spot.

TORNADO FLUSH

Powerful flush for thorough cleanliness

TORNADO FLUSH reaches every inch of the toilet bowl – all the way to the edge. The water is propelled into the bowl, creating a whirlpool that harnesses the power of the water for thorough cleansing. The high-quality ceramic used in TOTO toilets make this innovative technology possible.

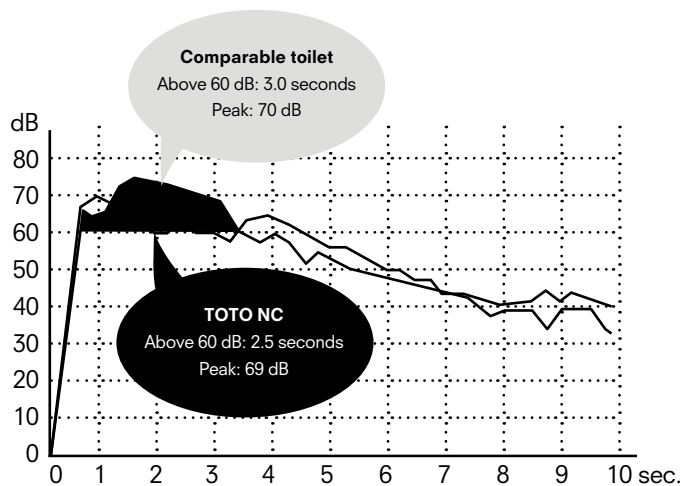

RIMLESS

Rimless ceramic toilet bowls

The RIMLESS design not only leaves no place for waste and germs to hide. It also makes for a much easier to clean toilet.

In comparison: a television at normal listening volume is 60 dB.

**Toilet with
optional WASHLET®**

FlexCovers hide the
openings needed to install
WASHLET® later on

Toilet today, WASHLET® tomorrow

TOTO toilets that can be upgraded to WASHLET® at a later time have the openings required for installation, which FlexCovers conceal in the meantime. This option allows you to plan for your future bathroom today.

FlexCover long (TCA571)

How it works

Compatible TOTO toilets already have openings for the water and electrical connections needed to install WASHLET®. Place FlexCovers over these openings to start using the toilet with its standard seat.

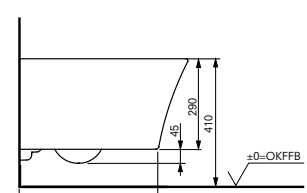

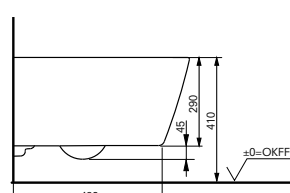

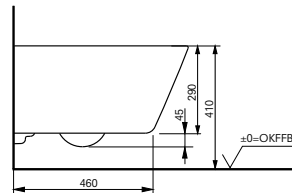

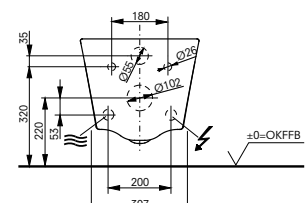

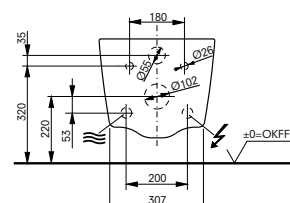

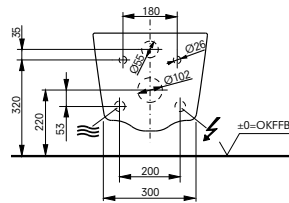

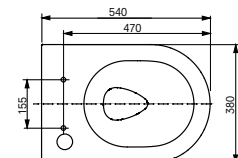

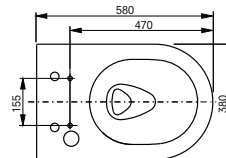

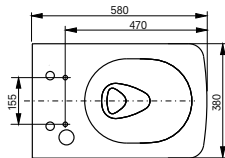

To upgrade, simply remove the toilet seat and FlexCovers, and then install WASHLET®. If the TOTO installation frame is used, it's possible to attach WASHLET® without removing the toilet from the wall.

Rimless toilets with optional WASHLET®
