TOTO

Above the rim wand jet placement – for maximum hygiene

Every WASHLET™ features proven TOTO clean technologies. Importantly placing the **wand jet above the toilet bowl** thus avoiding contamination. This keeps the WASHLET™ incredibly clean – like the very first time it was used. WASHLET™ is a shower toilet from TOTO with the highest hygiene standards.

WASHLET™

TOTO always positions the wand jet above the ceramic bowl

Hygienic wand jet

- Positioned above the ceramic bowl – away from the “action”
- Cannot come into contact with urine or faeces after use
- Cannot come into contact with flushing water
- A higher position protects the wand jet and components from being affected by rising water due to a clogged toilet

Conventional shower toilet

Wand jet placed within the toilet bowl

Great potential for contamination

- Positioned in the middle of the “action”
- Tip of the wand jet can come into contact with urine and faeces
- Wand jet can come into contact with flush water
- Wand jet and technology are placed within the toilet bowl, and can be contaminated if the toilet is clogged

Cleanliness and comfort. TOTO makes the difference.

Gentle warm water cleansing, odour extraction and a heated seat enhance the well-being of everyone who uses WASHLET™. Comfort is a top priority for all TOTO products – it's how we turn daily habits into enriching experiences.

Exclusive
TOTO
technology

Since the product launched in 1980, TOTO has continuously developed WASHLET™ technologies to achieve even greater cleanliness and hygiene. Many of these sophisticated technologies are truly unique and only available from TOTO.

WASHLET™

As clean as brand new –
with every use

PREMIST

Automatically sprays a fine mist of water on the toilet bowl before each use, forming a film of water that makes it more difficult for waste and dirt to accumulate.

Rimless design

The rimless toilet bowl is standard on all TOTO toilets. There are no difficult to reach places for dirt and waste to accumulate.

DRYER *

Warm air drying reduces toilet paper use.

CEFIONTECT glaze

Ultra-smooth ceramic leaves nowhere for waste to cling.

TORNADO FLUSH

Each toilet features the highly effective TORNADO FLUSH.

Hidden jet above the rim

The fully covered chamber protects the wand jet and dryer from dirt and contamination.

EWATER+ *

Depending on the model, the toilet bowl and/or WASHLET™ wand jet are cleaned with electrolysed water after use.

Self-cleaning wand jet

The wand jet automatically cleans itself inside and out before and after each use.

Decalcifying function *

Depending on the model, WASHLET™ is easy to decalcify.

Wand jet position

The wand jet extends at a 43° angle during cleansing. This careful positioning means faeces cannot come into contact with the wand jet during cleansing.

Wand jet material

The wand jet is made of a silicone-based material, which makes it difficult for dirt or waste to stick.

* Only selected WASHLET™ models offer this feature.

WASHLET™

For every taste and price class

Millions of customers around the world rely on their TOTO WASHLET™. TOTO's over 40 years of experience guarantee the best hygiene and most sophisticated technologies.
