

Checklist for buying a shower toilet

Hygiene:

- Wand is thoroughly cleaned before, during and after toilet use
- Wand is positioned above the toilet bowl (very important!!)
- Wand is behind a protective flap
- Wand extends at an angle that keeps faeces from coming into contact with it
- Different water spray types for front and rear intimate areas
- Hygienic stain-resistant material (e.g. silicone-based) used in all sensitive areas like the wand and spray nozzle
- Additional technologies that ensure the greatest possible cleanliness and hygiene

Comfort:

- Adjustable water spray (position, pressure, temperature)
- Effective carbon filter system if odour extraction is desired
- Dryer (adjustable)
- Seat heats up evenly (adjustable)
- Remote control
- Ability to save user profiles

Other features:

- Manufacturer has extensive experience in producing shower toilets
- Long-lasting, high-quality
- Sustainable components, e.g. water-saving spray, energy saving mode or smart surfaces that require less aggressive cleaning products
- Quick, effective after sales service in the event of issues
- Good shower toilets are practically maintenance-free
- Descaling mode
