

# UPGRADE FROM TOILET TO WASHLET®.

## THIS IS HOW IT WORKS:

The WC ceramics for WASHLET® already have an installation opening for water and electricity. When used as a toilet with a standard WC seat, this opening is covered with the FlexCover. It's quick and easy to upgrade to WASHLET® at anytime, only the power connection needs to be in place.

With the TOTO frame system, switching from WC to WASHLET® can be done within minutes. The ceramic does not even need to be removed from the wall – all connections are accessible.
